What could you miss in a storm?

Clear vision is perhaps the single most important component to safe driving. You can't avoid what you can't see.

Being able to see what's in front of you, even a fraction of a second sooner, gives you longer to react. That could mean the difference between an accident, and a safe drive home.

see clearly

safe driving

Protect your point of view - and your wallet!

Your ability to see the road, other traffic and pedestrians is very important in keeping you and your passengers safe. Inclement weather and damage from road debris are a constant concern. With PermaPlate Windshield Protection you will have the clearest view possible, no matter the weather.

If your windshield does become cracked or chipped by propelled road debris, our Comprehensive Warranty provides for repairs or replacement by our Windshield Professionals at your dealership, home or office.

Your vehicle is kept in safe driving condition, and you don't have any additional cost.

Stronger and Clearer Glass

PermaPlate Windshield Protection chemically bonds to the surface of your windshield, strengthening and improving the qualities of automotive glass by:

- increased windshield strength
- lowers the friction coefficient of glass, thereby deflecting more road debris
- repelling water, ice and snow
- improving rain vision and reducing night glare
- reduces pitting and cracking
- increases UV resistance
- makes surface easier to clean
- protects against acid rain water spotting, corrosion and mineral build-up

Fully transferable warranties • Hassle-free claims • Nationwide service
